Summary:

Data Analytics enthusiast with practical experience in SQL, Python, and Power BI, and a strong interest in transforming raw data into meaningful business insights. Skilled in EDA, data cleaning, KPI analysis, and dashboard design. Actively developing analytical thinking through real-world datasets and projects, with a passion for continuous learning and problem-solving in data-driven environments.

Qualification:

Skills

Programming & Query : SQL , Python , R

Data Visualisaton & Reporting : Power BI , Excel ,
Power Query (ETL)

Analytics: KPI Reporting, Interactive Dashboards, DAX,
Time Intelligence, Data Modeling, Python (EDA)

Statistics(R) : Anova Test, Chisq Test , T Test

Soft skills: Public Speaking , Good Communication

BSc - IT July 2024 - Present Rizvi College
Mumbai
SGPA: SEM IV – 8.73

HSC (12th) Science (PCM) 2021-2023
Lokmanya College Nallasopara(E)
Grade: Distinction(76.33%),

SSC (10th) **Grade: Distinction (84.40%).**

Professional Experience:-

Data Analyst Intern - HEProAI | Feb 2026 to Apr 2026

- Conducted EDA on financial datasets to identify trends and insights.
- Cleaned and transformed data using Excel, SQL, and Python.
- Developed interactive Power BI dashboards for Financial Planning & Analysis (FP&A).
- Created reports and visualizations for revenue, expense, profit, cash flow, and variance analysis.
- Worked with Power BI, SQL, Python, Excel and analytics techniques.

Projects::

1. Customer Behavior Analysis Dashboard:

This project is a Power BI interactive dashboard designed to analyze customer behavior, purchasing patterns, and revenue trends. It helps businesses understand who their customers are, what they buy, and how they shop.

Tools Used :-

Power BI , DAX , Excel , Data Cleaning & Transformation, Data Modelling , Visualization & Insights , Python (EDA)

2. Bookstore SQL Project:

This project demonstrates the use of PostgreSQL to build and analyze a relational database for a bookstore. It contains sampled datasets for books, customers, and orders tables and covers SQL queries from simple data retrieval to advanced analytics.

Tools Used : - SQL , Advanced SQL queries

3. Students Using AI tools:

Performed exploratory data analysis on a dataset of 400 students to evaluate AI usage patterns and their impact on academic performance using python

Python , EDA , Chisquare Test , Applied Statistics

Certifications:

GenAI Powered Data Analytics (Forage) | July 2025

Deloitte Australia – Data Analytics Job Simulation (Forage) | October 2025
